

# Evo T5

## Advanced 5-Phase Controller

The EVO® T5 is a vehicle-only portable signal controller. The T5 offers 5 phases which can operate two signals per approach, in addition to the standard phase linking facility. The EVO® T5 can be used as a vehicle master controller, or a vehicle or pedestrian signal controller.

### APPLICATIONS

- Traffic
- Pedestrian

### FEATURES

- 5 vehicle phase portable signal controller
- System configurable with up to 10 vehicle heads
- Compatible with EVO® systems up to 34 heads
- TOPAS approved
- For use with Micro, RadioMaster and EvoPed base units
