

RC2 Trailer

Unbraked Portable Signal Trailer

Our compact RC2 unbraked trailer is specifically designed to carry up to four RadioConnect2 portable traffic lights.

The low bed height makes loading signals safe and simple via the ramp tail, and signals are secured in place using a frame system and ratchet straps, making use of the RC2's integral tie down points.

The trailer's compact form makes it easy to manoeuvre and store.

FEATURES

- Carries 4x RadioConnect2 signals
- Safe, secure and simple to use
- Compact and easy to manoeuvre
