RoboSign® is ideal when a simple, one-man manual traffic control solution is required.

RoboSign

RoboSign is a fully radio-controlled stop-go signalling system that is designed to aid traffic operatives when performing manual control.

Easy to use, RoboSign operates with just one button press, allowing a single user to safely control two-way traffic from a safe position at the roadside.

The battery operated system provides up to 100 hours of continuous operation for the unit and up to 12 hours of continuous use for the remote control. Both components are supplied with rechargeable batteries.
